

## Ultrastructure and bioactivity of Ipomrea carnea extract

Filesize: 7.04 MB

### ***Reviews***

*Extremely helpful to all type of individuals. It really is basic but excitement inside the 50 % of the pdf. Its been designed in an remarkably basic way and is particularly only right after i finished reading through this book in which basically transformed me, change the way i believe.*

LAP Lambert Academic Publishing Mai 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x7 mm. This item is printed on demand - Print on Demand Neuware - Several pressures have accelerated the search for more environmentally and toxicologically safe and efficacious pesticides. Most commercially successful pesticides have been discovered by screening compounds synthesized in the laboratory for pesticidal properties. The increasing incidence of pesticide resistance is also fueling the need for new pesticides. Furthermore, most synthetic chemicals pesticides are halogenated hydrocarbons with relatively long environmental half-lives and more suspect toxicological properties than most natural compounds. Thus, natural compounds have increasingly become the focus of those interested in discovery of safety pesticides. Most people believe that natural pesticides are safer and more Eco-friendly than man-made pesticides. Thousands of the plant secondary compounds have been identified as natural pesticides. Natural pesticides will always be around, but people needed to smart up regarding their use and effectiveness. This contributes with a useful background of the exploitation of plant-derived pesticides, highlights possibilities and limitations and gives guidance for future work. 112 pp. Englisch.
