Wchnschr., 1893, SO, 417. 5. A more extended form of this table will be found in Paper 15 of this series. The Archives Int. Med., 1916, 17, 974. 6. In this discussion the patients S. W. of Kraus and H. of Bohland were omitted, there being some uncertainty as to which type of leukemia they belonged. blood cells. He based this belief on observations made on the metabolism of leukemic blood which he carried out by several methods, chiefly by Bohr s blood gas pump or the Haldane-Barcroft blood gas analysis apparatus. Calculating from such experiments, he found that in individual cases the oxygen demand of the total number of leukocytes in the body might form as much as 10 per cent. of the patient s total oxygen requirement. The intensity of the rise in basal metabolism, Grafe found, ran parallel...
