

Information systems in a management structure

By Nielen, G. C.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Information technique as a profession is still so young, that few opinions have settled. The influence of the new possibilities in information technique on the functioning of organisations is so little understood, that important questions like: what is the potential of a computer in the firm, will management ultimately be replaced by one man-with-a-keyboard, remain unanswered. Many people are convinced that the impact of computers on the way we manage our enterprises will be enormous, but they grope in the dark for qualitative and quantitative measures to describe it. Naturally, at this early point in the development, the present applications of the computer appear incidental and offer no basis for a quest into its potential. Moreover, the present descriptions of management structures preclude an exact study of these structures, let alone a quantitative treatment of any influence upon it. In this study a number of exact concepts is developed to describe the typical grouped tasks as they occur in an organisation. These concepts are characterised by the fact, that the activity of management units can be described comprehensively in terms of data processing. After all, practically everything we...

Reviews

The publication is fantastic and great. It really is basic but shocks from the 50 percent from the ebook. Its been written in an remarkably easy way in fact it is only soon after i finished reading this ebook in which really changed me, alter the way in my opinion.
